Welcome to Paw Print!

Wrinkly noses, tiny paws and curly tails are just some of the many things we love about puppies! Since National Puppy Day is in March, we'd like to celebrate the puppies in all of our lives! In honor of this special day, we have listed some tips for caring for your precious pooch during the early years!

Mini Puppy Teethers

Finally a chew toy designed for tiny mouths! Perfectly sized for your small dog or puppy, Puppy Teethers give your baby dog somethin' to chew on! Super soft for snuggling, yet armed with some seriously chew-worthy parts, Puppy Teethers will keep your dog's mouth busy and tail waggin'!

Puppy proof your home!

- Before you bring a new puppy home it is important to prepare for the curious pooch that is on the way into your house. Putting safety locks on cabinets that contain cleaners is a must. It is also important to conceal any electrical wires your puppy might try to play with. Move house plants out of reach to keep your puppy from ingesting harmful toxins.

Play time

- Puppies are active and curious, so it is a good idea to have plenty of toys for them to play with. Teething toys such as the Fat Cat Puppy Teethers are perfect for satisfying your pup's urge to chew!

Socialization and training

- Once your puppy has been vaccinated and you have consulted with your veterinarian, it is a good idea to enroll your puppy in a training course to teach good habits at an early age. This will also allow your puppy to interact with other dogs and begin the socialization process. If you are not able to enroll your dog in a course, make sure you begin training your puppy at home to avoid bad habits from forming.
